PROFESSIONAL SUMMARY

MCA graduate (2026) with 8+ months of software engineering experience across two internships and three end-to-end web application projects. Proficient in Java, Python, PHP, JavaScript, and Node.js with hands-on experience in enterprise application development, MVC architecture, REST API development, and MySQL database design. Skilled in Software Development Life Cycle (SDLC), test-driven development, transaction management, dependency injection, inversion of control, aspect-oriented programming, and DevOps methodologies. Experienced in agile workflows, batch processing, data access frameworks, and enterprise system integration. Pass-out year: 2026. No active backlogs.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, PHP, JavaScript (ES6+), Node.js, C++
- **Backend and Frameworks:** Django, REST API Development, MVC Architecture, JEE concepts, Dependency Injection, Inversion of Control, Aspect-Oriented Programming, Functional Programming
- **Frontend:** HTML5, CSS3, Bootstrap 5, Responsive Web Design, Cross-browser Compatibility
- **Database:** MySQL, schema design, CRUD operations, indexing, joins, query optimisation, data access frameworks, transaction management
- **DevOps and Version Control:** Git, GitHub, branching, pull requests, code reviews, DevOps methodologies, JIRA
- **Methodologies:** Agile, Scrum, SDLC, Test-Driven Development, Batch Processing, Enterprise System Integration, Role-Based Access Control
- **Tools:** VS Code, Postman, XAMPP, MS Excel, Power BI

PROFESSIONAL EXPERIENCE

Edutainer, Bangalore

Feb 2026 – May 2026

Web Development Intern

- Developed 10+ responsive web pages using HTML5, CSS3, and JavaScript (ES6+) within agile sprint cycles applying SDLC and DevOps methodologies, reducing page-level defects by 40%.
- Applied aspect-oriented programming principles including separation of concerns and modular design to achieve consistent cross-browser rendering across Chrome, Firefox, and Safari.
- Collaborated in a 4-member team using Git feature branches, GitHub pull requests, and code reviews following DevOps and sprint delivery processes.
- Translated wireframes into accessible, responsive web interfaces using test-driven development practices, consistently meeting sprint delivery targets.

Innovant IT Solutions, Bangalore

Jun 2024 – Jul 2024

Software Development Intern

- Designed and developed 5+ full-stack web application modules using PHP, MySQL, and MVC architecture implementing CRUD operations with clean, reusable code.
- Built and integrated REST API endpoints for enterprise system integration, connecting frontend inputs to MySQL backend achieving 100% data accuracy across all modules.
- Implemented transaction management logic to ensure data integrity across multi-step form submissions and CRUD operations.
- Optimised SQL queries using indexing and structured joins applying data access framework best practices to improve data retrieval performance.

PROJECTS

AI-Driven Smart Quiz and Certification System

Python, Django, REST API, HTML5, CSS3, JavaScript, MySQL

- Designed and developed a full-stack enterprise web application using Django MVC and MySQL applying dependency injection, inversion of control, and layered architecture principles.
- Built REST API endpoints for quiz submission, session handling, and result retrieval integrated with JavaScript frontend, demonstrating enterprise system integration.

- Implemented automated answer evaluation, dynamic result calculation, and batch processing for PDF certificate generation applying transaction management and functional programming.
- Managed full project lifecycle on GitHub using feature branching and versioned releases following SDLC and DevOps workflows.

Hospital Management System

PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap 5

- Built a multi-role enterprise web application using PHP MVC and MySQL with secure session-based authentication, appointment booking, and role-based access control.
- Designed relational MySQL schema with foreign key constraints and optimised joins applying data access framework patterns for complex queries.
- Implemented transaction management for multi-role data operations and enterprise system integration, tested across mobile and desktop viewports.

Student Attendance Management System

PHP, MySQL, HTML5, CSS3

- Developed a role-based attendance tracking application with secure login, server-side session management, and parameterised SQL queries validated across 10+ edge cases using test-driven development.
- Implemented batch processing for real-time attendance recording and retrieval using structured MySQL queries applying functional programming and data access best practices.

EDUCATION

Master of Computer Applications (MCA) - Computer Science

Atria Institute of Technology, Bangalore

May 2026

GPA: 8.5 / 10

Bachelor of Computer Applications (BCA) - Computer Science

Sahyadri Science College, Shivamogga

Aug 2024

GPA: 8.7 / 10

CERTIFICATIONS

- Hands-On Web Development with JavaScript - Infosys Springboard, 2025
- HTML and Java - EduPyramids / IIT Bombay, 2025
- Python for Data Science - Infosys Springboard, 2025
- MongoDB Querying - Infosys Springboard, 2025
- Google Cloud Computing Foundations - VTU MOOC, 2026
- Artificial Intelligence in Real World - UpGrad, 2025
- Business Analytics with Excel - Simplilearn, 2025
- Power BI for Beginners - Simplilearn, 2025
