

JNANAVI N N

Software Engineer – Web Development

Bangalore, India | jnanavingowda12@gmail.com | +91-7676715045
[linkedin.com/in/jnanavi-n-gowda-40b038310](https://www.linkedin.com/in/jnanavi-n-gowda-40b038310) | github.com/JNANAVIGOWDA

PROFESSIONAL SUMMARY

MCA graduate (2026) with 8+ months of hands-on software engineering experience across two internships and three end-to-end web projects, all available on GitHub. Proficient in full-stack web development using HTML5, CSS3, JavaScript, PHP, Python, and Django. Experienced in REST API development, MySQL database design, MVC architecture, and Git-based team workflows. Consistently delivered production-ready web solutions within agile sprint cycles. Seeking a Software Engineer – Web Development role at a global technology organisation to contribute to scalable web application development and grow within a structured engineering environment.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, Responsive Web Design

Database: MySQL – schema design, CRUD, joins, indexing, query optimisation

Web Concepts: Cross-browser compatibility, Session management, Role-based access control, SDLC, Agile

Backend: PHP, Python, Django, REST API Development, MVC Architecture

Version Control: Git, GitHub – branching, pull requests, code reviews, merging

Tools: VS Code, Postman, XAMPP, JIRA, MS Excel, Power BI

PROFESSIONAL EXPERIENCE

Web Development Intern

Feb 2026 – May 2026

Edutainer, Bangalore

- Engineered 10+ responsive, cross-browser web pages using HTML5, CSS3, and JavaScript (ES6+) within an agile sprint workflow, improving UI consistency and reducing page-level defects by 40%.
- Collaborated in a 4-member development team using Git feature branches and GitHub pull requests — participating in code reviews and sprint demos before each deployment.
- Implemented adaptive CSS layouts ensuring pixel-accurate rendering across Chrome, Firefox, and Safari, boosting overall page stability by 35%.
- Translated wireframes into accessible, responsive web interfaces by following SDLC best practices, consistently meeting sprint delivery targets with minimal supervision.

Software Development Intern

Jun 2024 – Jul 2024

Innovant IT Solutions, Bangalore

- Designed and developed 5+ full-stack web application modules in PHP and MySQL using MVC architecture, implementing CRUD operations with clean, maintainable, and reusable code.
- Built and integrated REST API endpoints for form processing and data handling, connecting frontend inputs to a MySQL backend and achieving 100% data accuracy across all modules.
- Optimised SQL queries using indexing and structured joins, improving data retrieval performance across high-frequency application operations.
- Managed code on GitHub using feature branches and pull requests, contributing to a clean, version-controlled development workflow within the team's sprint cycle.

PROJECTS

AI-Driven Smart Quiz & Certification System

Tech Stack: Python, Django, REST API, HTML5, CSS3, JavaScript, MySQL

- Architected and built a full-stack web application using Django MVC and MySQL — implemented automated answer evaluation, dynamic result calculation, and PDF certificate generation.
- Designed and exposed REST API endpoints for quiz submission, user session handling, and result retrieval, integrated with JavaScript frontend via Fetch API.

- Managed full project lifecycle on GitHub using feature branching, incremental commits, and versioned releases — demonstrating real-world software engineering workflow.

Hospital Management System

Tech Stack: PHP, MySQL, HTML5, CSS3, JavaScript, Bootstrap 5

- Built a multi-role web application for doctors and patients using PHP MVC and MySQL — implemented secure session-based authentication, appointment booking, and prescription management.
- Designed a fully responsive Bootstrap 5 UI with role-based page rendering and access control enforced at the backend, tested across mobile and desktop viewports.
- Structured the MySQL schema with relational tables, foreign key constraints, and optimised joins to support complex queries across patient and appointment modules.

Student Attendance Management System

Tech Stack: PHP, MySQL, HTML5, CSS3

- Developed a role-based attendance tracking web app with secure teacher/student login, server-side session management, and parameterised SQL queries to prevent injection and ensure data accuracy.
- Implemented structured MySQL queries for real-time attendance recording and retrieval, validated across 10+ edge cases for correctness and performance.

EDUCATION

Master of Computer Applications (MCA)	Atria Institute of Technology, Bangalore	GPA: 8.5/10	<i>May 2026</i>
Bachelor of Computer Applications (BCA)	Sahyadri Science College, Shivamogga	GPA: 8.7/10	<i>Aug 2024</i>
